ACOUSTIC SOLUTIONS

2026 Habitat™ Collection

ACOULINE ACOUSTICS

We often focus on what we see - the light, the colours, and the layout. However, the most successful working spaces are those designed for what we hear. Acoustic boards are the essential bridge between a beautiful room and a functional one.

Whether in a bustling open-plan office, an educational space, or a creative studio, acoustic boards are the primary tool used to tune an environment for human comfort and peak performance.

As we move toward more collaborative and flexible environments, the noise of our daily lives has risen. Without acoustic treatment, these spaces become exhausting. In the modern landscape of open-plan offices and studious educational hubs, the invisible element of sound dictates the quality of our work. While visual design sets the tone, acoustic design defines the experience.

Acouline's specialised porous materials intercept and absorb sound waves, significantly reducing reverberation and the "echo chamber" effect common in modern architecture. Available in an expansive palette of colours and sophisticated patterns, these boards offer a versatile toolkit for any design aesthetic. Whether you are outfitting a collaborative office or a quiet study hub, Acouline provides the technical excellence needed to harmonise your space's visual and auditory experience.

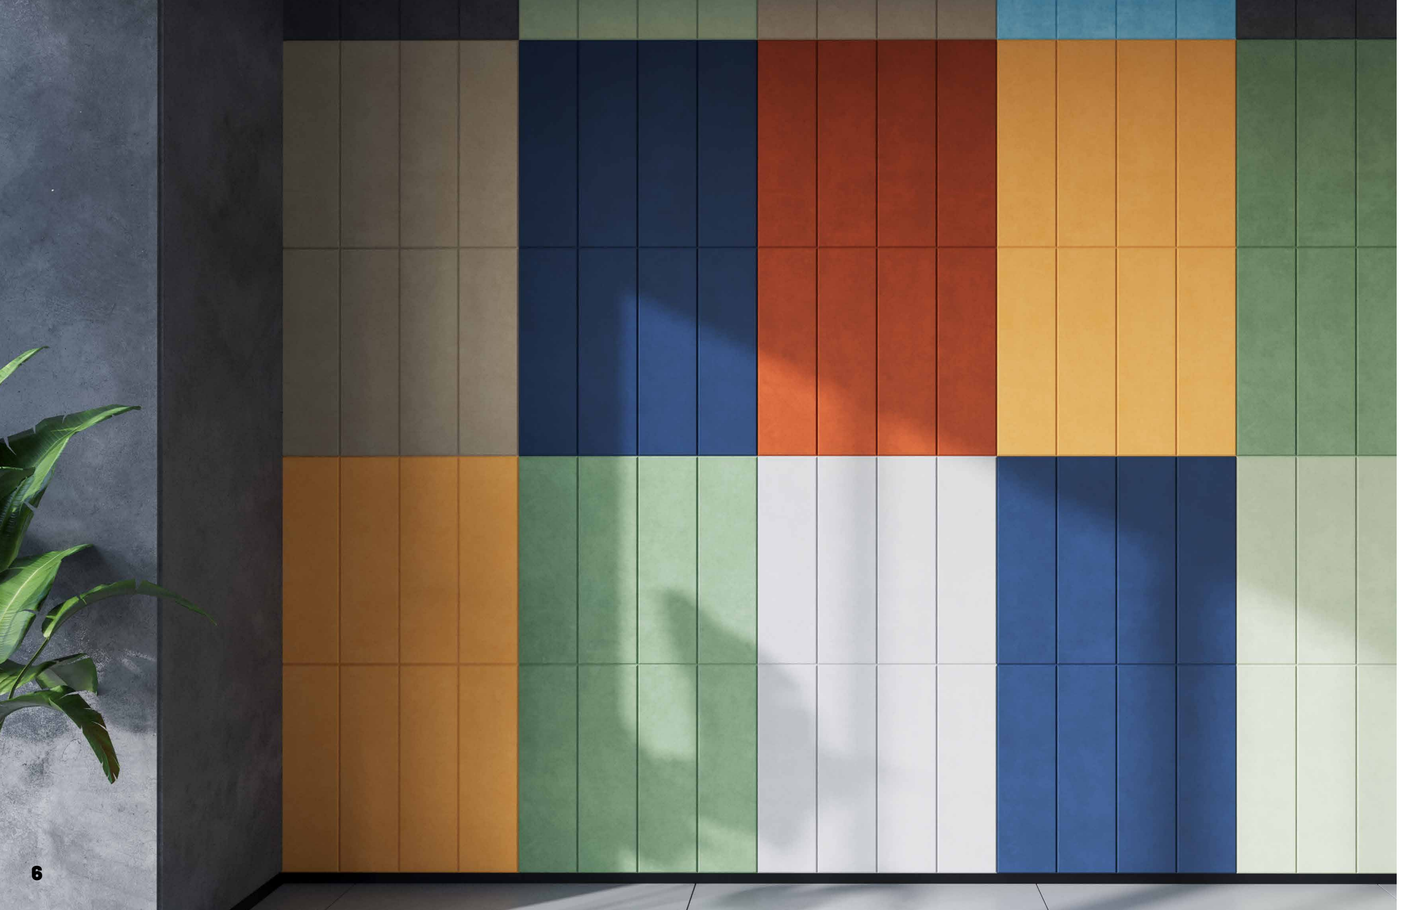
WHY ACOULINE?

Acoustics are a fundamental architectural layer. Rather than treating sound as an afterthought, Acouline merges precision engineering with sophisticated textures to curate atmosphere with intent.

At Acouline, we believe that a space should support the people within it, and that silence isn't only the absence of noise, but the presence of focus. In environments where communication and deep attentiveness coexist, untreated surfaces reflect sound waves, creating echoes and overlapping chatter. Our solutions are engineered to intercept these reflections, transforming collaborative environments into balanced, high-performance zones. Choose from a rich array of textures and colours to create a custom geometric installation that complements your brand identity.

Acouline boards are engineered to provide the technical infrastructure to ensure that your design is experienced in perfect clarity. By managing the invisible, we make the visible more impactful.



Habitat ™ Collection

Inspired by the natural world, The Habitat Collection brings together 14 timeless colours that echo the tones of earth, water, and foliage. Designed with sustainability at its core, this palette creates calm, functional spaces that connect people back to nature. From soft neutrals to rich accents, The Habitat Collection offers designers a versatile foundation for interiors that are as environmentally responsible as they are beautiful.

Acouline Wall Panels

WALL PANELS

Acouline Wall Panels serve as a functional design statement, turning vast, reflective surfaces into powerful sound-absorbing features. By breaking up parallel wall reflections, these panels eliminate flutter echoes and sharpen speech clarity for meetings and presentations. With contemporary design at their core, Acouline Wall Panels prove that you don't have to sacrifice style to achieve a perfectly balanced acoustic environment.

DESK MOUNTED SCREENS

A subtle layer of privacy for the modern workstation. Acouline Desk Mounted Screens sit lightly on the desk surface, helping soften the everyday distractions of open-plan environments. Multiple mounting options allow them to integrate across a wide range of desk systems, while three heights and two panel thicknesses provide flexibility, and their soft, radial corners complete the form with a calm, considered edge.

WORKSTATION SCREENS

Bring peace and privacy directly to the desktop with Acouline Workstation Panels designed for the individual user. These high-density dividers create a personal acoustic cocoon, shielding staff from the immediate distractions of keyboards, phone calls, and nearby conversations. Use with Boost and Halo height adjustable desk systems to foster deep focus in high-energy environments. By treating noise at the source, these panels empower employees to perform at their peak throughout the day.

END WRAP SCREENS

Reshape your cubicle with a continuous gesture around the workstation. Acouline End Wrap Screens extend beyond the desktop, wrapping around the ends to create a more defined and protected work setting. The result is a quiet architectural frame that helps stylishly mute nearby distractions. Two heights and two panel thicknesses allow the screen to adapt to different workspace needs.

End Wrap Return Length: 400mm
Corners: Radial
